Ever wonder why... Doctors can't find the cause for many diseases?

It's because they are conditioned to ignore the relationship between illness and vaccines. These are some of the diseases that have documented associations with vaccines:

- Allergies & Eczema.
- Arthritis & Asthma.
- Autism.
- Acid reflux requiring an infant to take proton pump inhibitors, which have many side effects.
- Cancer.
- Diabetes (*infant and childhood*).
- Kidney disease.
- Miscarriages.
- Long list of neurological and autoimmune diseases.
- Sudden Infant Death Syndrome (*SIDS*).
- And many, many more.

These are some known vaccine side effects, documented in medical literature and/or in package inserts:

- Arthritis, bleeding disorders, blood clots, heart attacks, sepsis, ear infections.
- Fainting (*with reports of broken bones*).

From an article, *Vaccines. Get The Full Story*, by the *International Medical Council on Vaccination*.

See more articles and fatwas on all vaccines & polio drops at www.muslimhealthwatch.org

- Kidney failure requiring dialysis.
- Seizures /epilepsy.
- Severe allergic reactions, such as hives and anaphylaxis. Sudden death.
- Many common diagnoses given for hospital admissions.
- The National Vaccine Injury Compensation Program, has awarded more than \$1.2 billion in damages to children and adults injured by vaccines.

Autism is associated with vaccines.

- Autism was rare until the mass vaccination programs were accelerated in 1991, with the introduction of the hepatitis B vaccine and the HiB (*meningitis*) vaccine. Tens of thousands of parents will attest that autism appeared in their children very soon after they were given these, and other vaccines.

Drug companies, insurance companies & the medical system get rich when you get sick.

- Vaccines do not give life long immunity, which means booster shots are recommended.
- Each booster shot increases the risk of more side effects.
- Vaccine side effects can make you sick for the rest of your life. Conveniently, there are many drugs to treat the side effects caused by vaccines.
- In the U.S., neither drug companies nor doctors can be sued when something bad happens from a vaccination. Both are protected by the 1986 National Child Vaccine Injury Act. This law, signed into effect by then-president Ronald Reagan decreed: "No vaccine manufacturer shall be liable in a civil action for damages arising from a vaccine-related injury or death." (*Public Law 99-660*).

Many doctors and health care practitioners do not get vaccinated and do not vaccinate their children.

Why not?

- They know vaccines are not proven to be safe or effective.
- They know vaccines contain dangerous substances.
- They know vaccines cause serious health problems.
- They have treated patients with serious side effects from vaccines.

The only people who benefit from being healthy are you and those you care about.

- Drug companies have infiltrated and seized control over the entire healthcare system, including medical schools, medical journals, hospitals, clinics and the local pharmacy. A doctor's very livelihood thus depends on blind faith, without questioning any aspect of any vaccination. Even when obvious evidence of vaccine damage occurs right before a doctor's eyes, s/he is usually unwilling to consider a vaccine as the cause. Though uncorrupted science and medicine support rejection of vaccines, doing so can be considered professional career suicide. The signatories to this document boldly risk this end for the safety of you and your child.
- Hospitals benefit financially from hospitalizations and tests.
- Drug companies make billions of dollars from vaccines.
- Drug companies make tens of billions of dollars from drugs given to treat side effects and life-time illnesses caused by vaccines.
- Vaccines are the backbone of the medical system. Without vaccines, healthcare costs would go down because we would have a healthier overall society. We have exchanged chicken pox for autism, flu for asthma, ear infections for diabetes. The list goes on and on. In the zeal to eliminate a shortlist of relatively benign microbes, we have traded temporary illnesses for pervasive, life-long diseases, disorders, dysfunctions and disabilities.

How many vaccines are there?

- If U.S. children receive all doses of all vaccines, they are injected with up to 35 shots that contain 113 different kinds of disease particles, 59 different chemicals, four types of animal cells/DNA, human DNA from aborted fetal tissue and human albumin.
- If you think you don't have to worry about vaccines because your children are older, think again. There are at least 20 more vaccines currently in the development pipeline for release in the next few years, mostly targeting adolescents and adults.

Some Vaccine Ingredients: How is it possible that vaccines will not be harmful to your health?

- Stray viruses and bacteria from the animal cell cultures that vaccines are made in.
- Mercury, a well-documented neurotoxin, is still in the multi-dose flu vaccines throughout the world. Trace amounts remain in several other vaccines.
- Aluminum, a poison that can cause bone, bone marrow and brain degeneration.
- Animal cells from monkeys, **dog kidneys**, chickens, cows, and humans.
- Formaldehyde (*embalming fluid*), known carcinogen.
- Polysorbate 80, known to cause infertility in female mice and testicular atrophy in male mice.
- Gelatin, from **pigs** and **cows**, known to cause anaphylactic reactions, is found in large quantities in the MMR, chickenpox and shingles vaccines.
- Monosodium glutamate (*MSG*) in inhaled flu vaccines, known to cause metabolic disturbances (*e.g. diabetes*), seizures & other neurologic disorders.

Conflicts of Interest.

- The same people who make rules and recommendations about vaccination profit from vaccine sales. For example, Dr. Julie Gerberding, who was in charge of the CDC for eight years, is now the President of Merck Vaccines. Dr. Paul Offit, a member of the Advisory Committee on Immunization Practice (*ACIP*), developed and patented his own vaccine.

- According to the CDC, the average U.S. 10-doctor pediatric group has over \$100,000 of vaccine inventory in their office to sell. These doctors make money from office visits, from giving your children vaccines, and also from follow up office visits for assessing reactions.

Vaccine Exemptions in the U.S.

- You do have the right to refuse. Use it. Your child does not have to be vaccinated to attend public school.

To have vibrant health, you will need to take the initiative to learn some new things.

- Babies are born with powerful, natural defenses. If this were not so, all would die shortly after birth. Enormous cascades of complex immune processes start with the first cry. This needs to occur naturally, without the interruption caused by the injections of toxic substances.
- Learn that the primary keys to health are good nutrition, pure water, adequate sleep, routine exercise and happiness. You have **no control** over the outcome of a vaccination.

The Safe Choice is to **Say No To Vaccines!**

Muslim Health Watch, The Majlisul Ulama & the International Medical Council on Vaccination are asking for an urgent and open, scientific, medical debate on vaccines & vaccination. Thousands of western websites now expose and oppose the many harms, damage and death from vaccines, unknown to most doctors and the public at large.
