

# Vaccine Tricks To Fool Muslims

## VACCINE SALES DEPARTMENT

### Did You Know?

We are being fooled into taking harmful **Vaccines** and **Polio Drops** that may contain filth and impurities from aborted foetus, animal blood, baby foreskin, cow, dog, monkey, **pig**, homosexuals blood and more!

Many substances may be forbidden to Muslims, Christians, Jews, Hindus and vegans, but clever sales tricks can fool you into injecting these impurities into your little child and baby.

**Don't be caught out!**

[Read More ►](#)

### Vaccines may Contain Filth & Haraam.

Vaccines may contain filthy and impure substances from animals and humans, like cancer cells, cows blood & gelatine, dog kidney, infected homosexuals blood, monkey kidney, **pigs blood & gelatine**, pus from diseased animals and humans, plus many more!

Vaccines may also contain many toxic substances like aluminium, antibiotics, abortion drugs, anti-fertility drugs, aspartame, heavy metals, mercury, MSG, polysorbate, sorbitol, and many more!

Vaccines have been linked to nearly every disease we see today like autism, autoimmune disease, cancer, cot death, infertility, neurological disease, sterility and death. Worse still, new diseases never seen before, continue to increase as more and more vaccines are injected into our innocent little babies and children.

### Would you knowingly inject these substances into your child?

If the people really understood what was in a vaccine, it would be very difficult to sell harmful vaccines and polio drops to the public masses. To overcome this problem, many clever methods may be used that completely fool and confuse the Muslims, doctors and even religious scholars into supporting vaccination!

### Incorrect Medical Knowledge.

Vaccination is based on a long-discredited theory that stimulation of antibodies in the human body equals protection from disease. This theory has not only failed to be proved, but has been repeatedly disproved by many world doctors and scientists.

Drug companies have infiltrated and seized control over the entire healthcare system, medical schools, medical journals, hospitals, clinics and local pharmacy. Doctors are slowly conditioned and groomed into promoting a treatment that only targets symptoms, but does not cure. Patients are locked into a kind of slavery, requiring ongoing medical treatment, and vaccines cause further disease, securing future profits!

### Hidden Substances.

Many substances in vaccines may be hidden or disguised because they are forbidden to Muslims, Christians, Jews, Hindus, Vegetarians and Vegans, or linked to cancer, infertility, sterility, disease and death!

Vaccine substances may be legally hidden by the following methods and more...Trade secrets, patent rights, disclaimers on changes in raw materials and supplies, substances added but not intended as ingredients, and insane regulations that allow substances below a certain level to disappear from the list completely. Thimerosal free vaccines that actually contain mercury are still being injected globally.

### Medical Study Fraud.

Medical studies may be funded by vaccine companies and the results pre-ordained, biased or false. See *Vaccine safety tips and tricks*, by Neil Z. Miller, and *Why most published research findings are false*, by John P. A. Ioannidis.

### Polio Renamed.

Many disease like polio were never really wiped out. To hide vaccine failure, governments and doctors may simply rename diseases. Polio may now be diagnosed as acute flaccid paralysis, Guillain-Barre Syndrome, meningitis and more. Smallpox may be diagnosed as monkey pox and other diseases are renamed as such.

### Epidemics Caused By Vaccines.

Epidemics like polio are caused by vaccines. Instead of halting the program, governments say they now need to continue vaccinating to control the new epidemic. This illogical decision spreads polio & paralysis further!

### Vaccine Research by Muslim Scholars.

For **fatwas & information** on vaccines, visit the only Islamic Body to have extensively researched and written on vaccination, free from all vested interests. The Majlisul Ulama at [www.themajlis.co.za](http://www.themajlis.co.za)

## Misleading Graphs (Designed to sell vaccines).

More leaflets and fatwas at  
[www.muslimhealthwatch.org](http://www.muslimhealthwatch.org)

## Halaal Label Fraud.

Many Muslim doctors are cashing in on so called halaal vaccines. But halaal vaccines will never exist because vaccines do not protect against any disease. They actually cause and spread old and new diseases.

## Impure Substance Undergoes Change.

Incorrect fatwas may be issued saying that an impure substance has undergone change. Pig and cow gelatine are examples that may remain impure say new fatwas.

## Invalid Fatwas.

All previous fatwas supporting vaccination may be invalid because nobody fully knows what is really in any vaccine, or how vaccines work, not even the manufacturers, according to a UK high court judge.

## Bullying Tactics.

Hospital staff are programmed to push vaccines onto newly born infants, when parents are highly emotional and easily coerced, using scare tactics, lies and deceit!

## The Safe Choice is to **Say No To Vaccines!**

*Muslim Health Watch, The Majlisul Ulama & the International Medical Council on Vaccination* are asking for an urgent and open, scientific, medical debate on vaccines & vaccination. Thousands of western websites now expose and oppose the many harms, damage and death from vaccines, unknown to most doctors and the public at large.

**Learn more** about vaccines. Start by visiting the *International Medical Council on Vaccination*.  
[www.muslimhealthwatch.org](http://www.muslimhealthwatch.org)

**Petition** the *Ministry of Hajj* against compulsory vaccination. Keep our Hajj & Umrah pure & safe!

**Share with** family, friends, mosques & muftis.

## Measles - United States, 1950-2011

Source: National Notifiable Disease Surveillance System, CDC

CDC Graph

**The above graph** is a typical short term graph used by the CDC, WHO, governments and supporters of mass vaccination. The data points start immediately before the vaccine was introduced, making it appear that the vaccine wiped out measles. But data before 1950 is withheld because it shows a clearer picture, and would not convince anybody into taking the vaccine!

### This graph is very inaccurate, but sells vaccines!

It also shows cases of measles, not deaths, and fails to give enough information needed to make an intelligent and informed decision on vaccine efficacy. A true picture of measles cases can never be obtained for many reasons including the following...

- Cases of measles may be easily misdiagnosed.
- Thousands of patients do not report in to their doctor or hospital.

This same type of graph is used in Australia, UK, USA and globally to sell vaccines for various diseases. Even though it is highly inaccurate, it is promoted and relied upon by the vaccine companies, governments, medical schools, regulatory bodies, healthcare professionals and the sickness industry. Sickness makes big money!

## Measles - United States, 1900-2000

Source: Vital Statistics of The United States. © Muslim Health Watch

Muslim Health Watch Graph

**The above graph** is a long term graph by Muslim Health Watch. The data points start well before the vaccine was introduced, and clearly show that the vaccine did not wipe out measles. Measles declined well before the vaccine was introduced and is said to be due to things like improvements in sanitation and living conditions.

### This graph is very accurate, but does not sell vaccines!

It also shows actual death rates from measles clearly. Understand well that deaths from measles were nearly zero before any vaccines were introduced! It is very strange why so much money is wasted in vaccinating millions globally against diseases that kill so few, and that vaccines are actually causing and spreading new diseases. Instead, this money could be better spent on improved sanitation, sewerage systems, clean water and pure food supplies in the third world!

For more long term graphs showing that vaccines did not wipe out any disease globally, see the following...
